Profile

Material Science PhD candidate with a physics background, specializing in first-principles theory of magnetic multipolar order, symmetry-constrained response functions, and unconventional magnetism in real materials, with experience connecting group-theoretical predictions to experimental observables.

Education

University of Minnesota, USA — PhD, Materials Science	<i>Sep. 2023 – Present</i>
University of Copenhagen, Denmark — MSc, Physics	<i>Sep. 2021 – May 2023</i>
University of Pisa, Italy — BSc, Physics	<i>Sep. 2018 – Sep. 2021</i>

Articles

Published

- Interplay between charge correlations and superconductivity across the superconducting domes of $\text{CsV}_3\text{Sb}_{5-x}\text{Sn}_x$
Andrea N. Capa Salinas, Brenden R. Ortiz, Steven J. Gomez Alvarado, Sarah Schwarz, Ganesh Pokharel, **Luca Buiarelli**, Hyeonseo Harry Park, Shiyu Yuan, Roland Yin, Suchismita Sarker, Turan Birol, Stephen D. Wilson

Submitted [arXiv]

In preparation

1. Nonrelativistic spin-lattice coupling in g -wave altermagnets: signatures in diffraction, Raman, and elastic constants

Luca Buiarelli, Rafael M. Fernandes, Turan Birol

2. Interplay of spin-orbit coupling, occupation, and atomic displacements in altermagnetic piezomagnetism

Luca Buiarelli, Rafael M. Fernandes, Turan Birol

3. 3/8 instability in the Kagome metal CsV_3Sb_5

Luca Buiarelli, Hyeonseo H. Park, Ethan Ritz, Rafael M. Fernandes, Turan Birol

Workshops and Conferences

- Aspen Center for Physics, Winter Conference on Altermagnetism, Aspen *April 2026*
“Altermagnetic piezomagnetism and spin-lattice coupling” (poster)
- American Physical Society March Meeting, Denver *March 2026*
“ProDenCeR: a python code to project first-principles densities onto harmonics and representations” (contributed talk)
- Flatiron Institute, TRIQS School, Paris *September 2025*
- American Physical Society March Meeting, Los Angeles *March 2025*
“Magnetic multipoles in altermagnets” (contributed talk)
- School on Electron-Phonon Physics, University of Texas at Austin *June 2024*
- American Physical Society March Meeting, Minneapolis *March 2024*
“Structural properties of kagome-layered crystals” (contributed talk)

Awards and Fellowships

Matthew Tirrell Graduate Fellowship *2024*

Penne Amiche della Scienza

2025-Present

Science outreach program for Italian middle school students involving monthly letter exchanges, aimed at fostering interest in science and academic careers.

Skills

Coding: Python, Matlab, C/C++

First-principles: Abinit, VASP, Wannier90, pythtb

Scientific Software Development: Developed multiple post-processing tools for DFT and Wannier tight-binding Hamiltonians, including ProDenCeR, a tool to project first-principles densities onto harmonics and group representations, and an independent implementation of Wannier-based nonlinear optical conductivity interpolation.

Languages: English (fluent), Italian (native), Spanish (basic)
